Cyclodextrins in veterinary use
What are cyclodextrins (CDs)?

- Composed of sugars
- Cyclic molecules
- Naturally occurring compounds
- Used in food, pharmaceuticals, drug delivery, chemical industries, agriculture, etc.
Why use cyclodextrins?

- Significant solubility enhancement
- Improvement of chemical stability
- Increased bioavailability, facilitated delivery
- Reduced aggregation
- Moderated irritation or reduced side-effects
- Maximized safety, complete renal elimination
- Enables formulation of water-insoluble APIs in all dosage forms
- Lower API doses can be achieved
- Potential antidote for organophosphate poisonings
Who we are and what can we offer?

CycloLab is the world's only all-around Cyclodextrin Service Provider

Our services include:

• Supplying cyclodextrins for commercial products and product development
• Screening cyclodextrin derivatives to find the right candidate for target API.
• Providing formulation development services, composition optimization, stability assessment.
• Offering analytical services to characterize complexes and products.
• Preparing pilot-scale amounts for cyclodextrin-API complexes under GMP for development purposes.
• Assisting in compilation of regulatory documentation.

What is CycloLab?

Early phase drug development

IP services & consultancy

Analytical services

GMP synthesis and production
Antifungal agents

- **Voriconazole** is an antimycotic drug for both human and veterinary use.
- In the formulation, *sulfobutyl-ether-beta-cyclodextrin (Dexolve™)* is used as an excipient.

- **Itraconazole** (Itrafungol™), it is used as antimycotic drug in cats.
- In the formulation, *(2-hydroxypropyl)-beta-cyclodextrin* is used as an excipient.
• **Amiodarone** is an antiarrhythmic drug. It has several indications, and it is used in humans and in veterinary medication.
• A new formulation (Nexterone™, PM101) contains **sulfobutyl-ether-beta-cyclodextrin** as a solubilizing agent instead of Polysorbate 80.
  • Does not cause hypotension
  • Safe for bolus administration
  • Plastic-friendly allows for prefilled non-glass syringes in future
  • Currently FDA-approved only in glass syringe

• **Pimobendan** (Vetmedin™), is a calcium sensitizer and a selective inhibitor of phosphodiesterase 3 (PDE3) with positive inotropic and vasodilator effects, used for the treatment of heart failure in dogs.
• A new patent by Boehringer Ingelheim describes a formulation that consists of modified cyclodextrins¹.

¹ Boehringer Ingelheim Vetmedica GmbH, Liquid preparation comprising pimobendan, 2015, US9107952 B2
• **Maropitant** (Cerenia™), a drug used for the treatment of motion sickness and vomiting in dogs.

• In the formulation, sulfobutyl-ether-beta-cyclodextrin is used as a solubilizing agent.

• **Flubendazole** is an antihelmintic drug, used both in veterinary and human medication.

• (2-hydroxypropyl)-beta-cyclodextrin can be used as a solubilizing agent, to improve water solubility\(^2\).

---

• **Alfaxalone** (Alfaxan™), is a neuroactive steroid molecule with general anesthetic effects. It is used only in veterinary practice.

• In the formulation, (2-hydroxypropyl)-beta-cyclodextrin is used as a solubilizing agent.
Cyclodextrins are also used in vaccines

As an excipient, (2-hydroxypropyl)-beta-cyclodextrin is used.

- Suvaxyn PCV™ contains inactivated recombinant Porcine Circovirus type 1, expressing the Porcine Circovirus type 2 ORF2 protein. This vaccine is used for the active immunization of pigs over the age of 3 weeks against Porcine Circovirus type 2 (PCV2)
- **Sulfolipo-cyclodextrin (SLCD)** is used as an adjuvant
Other possibilities for cyclodextrin usage

**Vitamins and cyclodextrins**

- **β-cyclodextrins** improve pharmacokinetics of α-tocopherol in heifers
- Cyclodextrin encapsulated vitamin K (K₁, K₂) can reduce osteochondral effects in animals

**Cryopreservation**

- Cholesterol-loaded cyclodextrins can prevent cryosurvival of animal sperms
- Cholestanol-loaded cyclodextrins improve quality of stallion spermatozoa

**Essential oils and cyclodextrins**

Several patents are about essential oil formulations with cyclodextrins, e.g.:

- Camphor oil (-respiratory stimulant)
- Lemon oil (-flavor enhancer)
- Cinnamon oil (-flavor enhancer)
- Garlic oil (-antimicrobial)

**Effects of cyclodextrin complexes on methane production in heifers**

- The β-cyclodextrin complex with guest materials appears to be a promising solution to mitigate methane emissions without reducing energy intake.
